

## The Tech Team

The Tech Team are the amazing people who work behind the scenes providing for all Kairos' audio-visual-technology needs. You don't have to be rocket scientist or computer programmer wiz to help out on this team, but a good understanding of how to set up sound equipment, or use a mixing desk would be really helpful. Perhaps you've helped out with this at your home church before, or at other youth events.

We are looking for some dedicated people who can join this team and help out with all of the following:

- Setting up the site before Kairos begins – bringing in the equipment and setting up the venues.
- Setting up the audio-visual equipment ready for each main event
- Running the sound desk during the main event, and other sessions throughout the day
- Sound checking with the band and helping them to set up
- Meeting with the speakers/ presenters/ band to prepare anything they might need for their sessions
- Working with the site and safety team to make sure that all the equipment is used in a safe way and won't cause an accident
